

VOLUME XIV.

THE DAILY SENTINEL.

RUFUS KING & WM. H. WATSON,
PROPRIETORS.Under the Name and Firm of *Kings & Co.*

MILWAUKEE: Friday Morning, June 26.

The Collingwood and Toronto Route.

We made a brief mention, yesterday, of the fact that three gentlemen, Messrs Brown and Whittemore of Toronto, and Captain Dixie, a sailor of large experience upon Lake Ontario, had arrived to consult with our citizens in relation to subscriptions of stock to the proposed line of iron screw steamers, to connect the upper lake ports with Collingwood, and thus make a more rapid, speedy, and cheap route seaward via the Toronto and Lake Huron Railway. The large business done on that route in the first year of its opening is a guarantee of what can be done upon it, with a good line of steamers, owned by the Company, and making daily trips.

Buildings in the Clyde, in Scotland, have expressed their readiness to construct the steamers, and to take their pay one-third in the stock of the Company, and a large amount of stock will be taken in England, but it is necessary that a sufficient amount of stock should be taken on this side to show that those fully interested in the line deem it of sufficient importance to lend it a cordial support.

The amount of capital stock required is \$1,250,000, to build the necessary boats to make a safe daily line, and our Toronto friends feel that they can fairly call upon the business men of the western cities who are particularly interested in the success of the enterprise, to make liberal subscriptions to the stock. It is not, we understand, intended to call for more than 1 per cent of the stock for some months, and after that for 5 per cent every three months.

The gentlemen above named were present at the meeting of the Board of Trade yesterday morning, and Mr. Whittemore, on behalf of the interests represented by the delegation, explained their plan. After doing so, in a very clear manner, he stated that it was desirable that from \$20,000 to \$50,000 of the stock should be taken in this city.

H. E. Est, Esq., suggested that the amount of subscriptions here might depend somewhat upon the arrangements of the company. If the steamers were only to make this a side port, to call according to their convenience, and not to be depended upon for regular days, he thought that much would not be done; while a portion of the steamers made their regular port, it would be a matter of great interest to our business men.

It was suggested by Mr. Brown that there might be two subscriptions—one conditional, if the steamers make this a permanent—the other without condition.

After some further remarks, the following Committee was appointed to take the subject into consideration, procure subscriptions, &c., Messrs. E. H. Bronson, J. F. V. Elst, F. H. Goodrich, H. Hill, C. K. Wakiss.

NOTICE OF JULY CELEBRATION.

We give in another column a copy of the notice issued by the Committee of Arrangements, advising our country friends of the expected doings here on the coming Fourth. Should the weather, as we hope, be favorable, the celebration will be altogether the finest ever witnessed in this city.

ABOUT KANSAS.

We had the pleasure of a call yesterday from Hon. Lewis F. Potter, our member of Congress elect, who has just returned from Kansas, where he has been spending some time, in order to learn from personal observation the workings of various political matters there. He returned thoroughly satisfied that the course taken by the Free State men in disregarding the late Roger election, was the only proper one for them to take.

From the best information he was able to obtain, the Territory contains a population of nearly, if not quite, 70,000, and the proportion of adult males in such a territory is largely in excess, the ridiculously small vote polled by the Border Ruffian party and the "Walker-Dumore"—about 1,500 or 2,000—whereas when the vote will be, a fair vote can be held, open to the Free State men.

At Lawrence, no poll was held at all, the bogus officers failing to find it, not being able to find a place to hold the poll, or a man to vote. Gov. Walker failed to find any in said assembly at the "Hall of interest," as he expressed it, shown by the Free State men in the election. The Government is trying to play fast and loose between the two, but in pretty well understood by both.

APPEAL TO THE FEDERAL.—The Government organ, the *News*, is still dissatisfied because we are satisfied with the recent Convention in this city, and propose to "appeal to the people." If we remember the circumstances correctly, it made the same appeal last fall. We were satisfied with the result then; it also appealed to the people last spring, and we were again satisfied. The *News* can make another appeal if it chooses.

BOBBS BUFFETT IN KANSAS.—Fugitives, the numberless who have just returned in Judge Leavenworth's court in Kansas, made a batch of a pair of boots with a friend, who he would kill an abolitionist, before the sun should set. To make good his word he left town shortly afterwards, with a friend named Hopper, who, a few hours before, had passed through the place on his way to the interior of the territory. He overtook the meanest traveling, shot him down in cold blood, and galloped back to town, brandishing the bloody trophy as an evidence of the execution of his contract, and claimed the boots which he had won.

EDITORIAL CONVENTION.—The Portage City Record states that on a moderate computation, as many as 110,000 words can be telegraphed over the Atlantic Cable in every 24 hours, and improvements have lately been made and satisfactorily tested, which it is confidently believed, will render it practicable to transmit at least 200,000 words in the same time. From the differences in longitude of the continents in connection of the two Hemispheres as well as from the amount of business confidently anticipated, it will be necessary to keep the Telegraph in constant operation day and night. Now, assuming 300 working days within the year, this would at the price charged per word from London to New York, yield, after making all reasonable deductions and allowances to other lines, a net profit sufficient to satisfy the most sanguine expectations.

COMMENCEMENT IN CARROLL COLLEGE AT WAUKEE.—Will take place on the 15th of July next. The exercises connected with the occasion will be held in the Presbyterian Church, and will commence at 12 P.M., when the members of the graduating class will deliver their Orations, after which the President will give the Bibles, and deliver the Discourse.

ON THIS EVENING, an Address will be delivered before the Philanthropic Society, by Rev. Dr. Van Rensselaer.

The meetings of the College and Pergatory Department will begin on July the 9th, and close with the Senior Class on the 13th.

The parents and guardians of the students and the public generally, are respectfully invited to attend.

THE MINNESOTA ELECTION.—The St. Paul *Advertiser* of the 22d says:

We have given the Border Ruffian Democracy a sound rebuff without organization, and in all the disadvantages, the only possible result is that the party will be driven from the public friends with whom we can do with a proper organization and under a proper appointment for members of the Legislature.

FOURTH OF JULY!

Grand Celebration at Milwaukee!

The Eighty-Second Anniversary of American Independence will be celebrated, with appropriate exercises and a grand Military and Civic display, at Milwaukee, on Saturday, the Fourth of July next.

In the morning there will be a procession composed of all the Military and Fire Companies and Civic Associations. The procession will move through the principal streets of the city to the ground appointed for the customary exercises. These will consist of Orations in English and German, the Reading of the Declaration of Independence, and appropriate music, Vocal and Instrumental.

In the afternoon there will be a GRAND REGATTA on the River, free to all boats in this and adjoining States. Handsome prizes will be awarded to the winners.

In the evening there will be a DISPLAY OF FIRE-WORKS with music for Military bands and other entertainments.

All the Rail Roads leading into Milwaukee will run Excursion Trains for this occasion, at half the usual rates of fare.

Our friends from the country are cordially invited to visit Milwaukee on the Fourth and quiet with us, in celebrating, with becoming pomp and circumstance, the Anniversary of that never-forgotten day, which made OUR COUNTRY FREE.

Frank Dawlin, Albert Bade, Caleb Wall, A. J. Langworthy, John S. Filmore, Committee of Arrangements.

Tickets for the excursion will be good over the Milwaukee & Mississippi, La Crosse & Milwaukee, Milwaukee & Waterous, and Milwaukee & Horicon Railroads, on the 3d and 4th instants.

Extra trains will run over the La Crosse & Milwaukee R. R., the Milwaukee & Waterous, and Milwaukee & Horicon R. R., leaving Milwaukee at 10 o'clock on the night of the Fourth, thus giving visitors an opportunity to return home after the festivities of the day are over.

RAILROADS UNDER DIFFICULTIES.—The Mineral Point Tribune gives a history of the railroad just completed to that city. We copy the leading facts:

Proposals were received from several parties to take the contract, which was let to Messrs. Cook & Chamberlain on the 14th day of February, 1856, for the sum of \$150,000.

One provision of the contract placed in the hands of the contractors \$150,000 of County Bonds, conditioned upon a vote of the people of this county.

Within one week after the bonds were voted, Messrs. Cook & Chamberlain were released from the performance of their contract, and the company was again afloat on the sea of uncertainty. This ended contract number one.

A second contract was at length made with Messrs. Cook & Gates, for the grading, masonry and ties; the former having the first sixteen sections of the line. Under this arrangement considerable progress was made, and in October a contract was made with the Galena & Chicago and the Illinois Central Rail Road Companies, by which they jointly guaranteed to the Mineral Point Rail Road Company an annual net income of \$50,000.

Contract number three was now made and ratified on the 10th day of December, 1856, with the celebrated firm of R. & G. L. Schuyler, of N. Y., providing for the entire completion and equipment of the road by the first of December following, for the round sum of \$100,000, in cash, stock and bonds. This firm nearly completed the grading, and had purchased iron sufficient to lay the track.

About the last of June, the Schuylers failed.

Contract number four was made (August, 1857) with Messrs. Cook & Chamberlain, who had subsequently transferred to A. Wilkins, of Detroit, (contract number five) and finally passed to the hands of the present contractor, Mr. Lutcher & Co., whose name is not known.

The whole machinery interest of the country has been standing agast, to witness the Department of the Navy, going on year after year, advertising for bids of iron, to the lowest bidder, without reference to quality, size, or design, and the contractors are compelled to supply the lowest grade of iron, sulphuric acid, porous English iron, at \$50 per ton, and with triple weight, worthless "Scots" pig, at least \$25 per ton. In the national fiascœ, the last sale was made at \$100,000.

a hand, a hand, a hand, a hand, a hand, a hand,

a hand, a hand, a hand, a hand, a hand, a hand,

a hand, a hand, a hand, a hand, a hand, a hand,

a hand, a hand, a hand, a hand, a hand, a hand,

a hand, a hand, a hand, a hand, a hand, a hand,
